FAX: 541-826-8669

Phone: 541-826-5211 Mon-Thurs 9am - 5pm

After hours, an extensive computer voice-mail system describes bullet making techniques, products, and designs! Answers to hundreds of questions are available by phone, 24 hours a day, with our touch-tone information center. *Try it tonight!*

You can always write to us... just clip and tape:

CORBIN
PO Box 2659
White City, OR 97503 USA

How to contact **CORBIN**

The demand for Corbin swaging equipment has never been higher, with a flood of calls, faxes, letters, and personal visits...sometimes it may be hard to get through on the telephone! But we are anxious to hear from you! We answer the phone (541)-826-5211 Monday through Thursday, 9am to 6pm, but may be talking on another line. If you get the voice mail, just press the * button to interrupt and leave a message. Say your name and number carefully: you're familiar with it, but we might not understand if you say it too fast! Some callers fail to leave a clear enough message, or are so upset by not reaching a person so they don't leave any way to call back. We always call back when it is possible.

You can always reach us by FAX at (541)-826-8669 or by E-mail on the Internet (dave@corbins.com, or sales@swage.com), or using regular mail to PO Box 2659, White City, OR 97503 USA. You may save time by downloading a brochure: it probably has better illustrations than a letter or fax message. Requests for quotes often can be answered best by viewing the price list and product guidelines about selecting the best tool for the job, since you may see other options that you did not know existed. You can order on-line at www.Corbins.com by clicking the "secure server shopping cart" padlock. The shopping cart is a great way to browse products rapidly.
