### Hydro-Press™

Swage .17 cal. to 25mm bullets and reload up to 20mm, draw precision jackets and extrude lead wire. Make lead-free powder

metal bullets. The rugged Hydro-Press is the heart of custom bullet firms and ballistic labs around the world.

CHP-1 press

Uses  
Type -H Dies

Swaging (sounds like paging) is forming bullets with high pressure instead of heat.

- You don't have to melt lead.

There are no fumes, no burns, and very little prep or clean up afterward. You cut a piece of lead wire, drop it in the die, and pull the handle!

- Swaging gives you...

...More time to shoot, because it is so fast.

...Ultra high precision (up to 100 times rounder).

...Amazing weight control.

...Adjustable weight: one die = 1000+ moulds!

...Power to draw high precision jackets at home.

...Power to make lead-free powder metal bullets.

- Corbin will help you get started!

Send a drawing, sample, or description of the bullet for a quote to get exactly the right tools.
