World Leader in Swaging Technology Since 1975
Make Bullets your Way — Swage!

**Hydro- Press™**
Swage .17 cal. to 25mm bullets and reload up to 20mm, draw precision jackets and extrude lead wire. Make lead-free powder metal bullets. The rugged Hydro-Press is the heart of custom bullet firms and ballistic labs around the world.

CHP-1 press

**S-Press™**
Dual-Stroke Leverage

Swage .10 to .458 bullets, draw jackets from 1 x .03 strip and reload with this Roller Bearing Benchrest Quality CSP-1 Press

Uses Type -S Dies

Comes with reloading adapter, accepts 7/8-14 reloading dies and Corbin -S type 5/8-24 thread swage dies. Standard or long handle option.

**Mega-Mite™**
Triple Stroke Leverage

Swage .10 cal to 25mm bullets and reload up to 50 BMG, using this powerful Roller Bearing Reloading and Swaging Press.

Roller side-bar handle standard (shown). Long handle option

Bearing-guided ram, unequalled precision alignment.

Aprox. 70 lbs (31.8 kg) of rigid, precision strength.

New! All-steel base, frame and head with replaceable components and bearings for lifetime accuracy.

Swaging (sounds like paging) is forming bullets with high pressure instead of heat.

- You don’t have to melt lead.
  - There are no fumes, no burns, and very little prep or clean up afterward. You cut a piece of lead wire, drop it in the die, and pull the handle!

- Swaging gives you...
  - More time to shoot, because it is so fast.
  - Ultra high precision (up to 100 times rounder).
  - Amazing weight control.
  - Adjustable weight: one die = 1000+ moulds!
  - Power to draw high precision jackets at home.
  - Power to make lead-free powder metal bullets.

- Corbin will help you get started!
  - Check out our websites for procedures and price!
  - Send a drawing, sample, or description of the bullet for a quote to get exactly the right tools.

**CSP-2 Press**

Engineered for heavy use and long term accuracy: used by R&D labs around the world for cutting-edge bullet design.
Rebated boattails offer up to 40% higher BC than flat base, up to 15% tighter groups than regular boattails. Lead tip RBTs made in 5-die set (RBTL-5). ULD-TIP or Pin-Point style for High BC using Corbin metal tip inserts.

SWC shouldered bullets made in one stroke with the LSWC-1 die, including paper patch blackpowder bullets, airgun pellets, lead pistol bullets, and Foster-style shotgun slugs.

Smooth ogive bullets made in a 3-die set (FJ FB-3), including lead or jacketed rifle and pistol bullets.

PCM-2 Cannelure Machine
Put cannelures on bullets as fast as you can feed them (up to 30 per minute). Used by major bullet makers in their production lines, in military R&D labs, and by custom bullet makers.

HCT-1
Hand Cannelure Tool
Put factory knurled grooves on jacketed bullets, precisely at the depth and position you set. The HCT-2 knurls lead bullets with a diamond pattern. The HCT-3 puts multiple lube grooves on lead bullets. For .172 to .720 caliber (self-adjusting).

LW-10 Lead Wire
Pure lead wire from .10 to .430 diameter, with 10% off for cartons of four of the same size. Use lead wire instead of melting lead, for safety, speed, and precision.

CSL-2 Corbin Swage Lube
World’s best lubricant for drawing, swaging, extruding lead wire. Clean, water soluble. Required for all swaging and drawing operations, but also great for reloading!

Corbin Instant Calculators
on CD-ROM or USB drive. Makes designing bullets, lead wire extruders, hydraulic presses, and determining your commercial bullet pricing easy. Economical and simple to use.

Corbin Print Editions & E-Books
on CD-ROM or USB drive. Take them along with your laptop, turn long waits in airports into exciting opportunities to learn new ideas!

Corbin High Performance Bullet Jackets
High precision drawn jackets to make world-class rifle and handgun bullets, available in packages of 250 or 500. Redraw to special sizes and lengths with Corbin jacket draw and trim dies. Or draw your own from strip or tubing with Corbin Jacket Maker kits!

Make Free 224 or 243 Bullets!
Use fired .22LR cases, scrap lead and your standard reloading press. Everything you need is in the kit. Also available for 6mm. High quality target and varmint bullets, easy on the bore, excellent accuracy! KIT-224R... 224 (5.56mm) KIT-6MMR... 243 caliber
